harmful – needs – should -reusing – realising – waste – thrown - might

Pollution is the fouling of the environment – that is, land, water and air – by waste, smoke, chemicals and other substances. Every industrial country faces the problem of As factories make new goods for people to buy, old ones are out.

As industry a regular supply of raw materials, the best solution to the problem of waste is to make use of it as a raw material by or 'recycling' it. Smoke from factories and gases from motor vehicles pollute the air and damage people's health.

2. Circle the right alternative: (0.5 x6 = 3marks)

We all know about the effects of smoking on the health of smokers and the people they smoke around. However, many people are unaware of the harmful (affect /effects/affected) of smoking on the environment. So they (would / must/might) learn about it. Cigarette smoke contains chemicals. The air pollution that results (from/to /in) cigarette smoke is 10 times greater than that from (fuming car/fumes car/car fumes.)

Cigarettes also use a lot of paper. In fact, 600 million trees are cut (on /up/down) per year to supply the cigarette industry. Tobacco is also grown using a lot of pesticides (where /who/which) depletes the ozone layer.

Good food, and a healthy diet, is about variety and balance. Those who cook on television and publish cookbooks should **(to uphold)** those fundamental pillars of sound nutrition. But that applies across the whole spectrum of our recipes. It **(not necessarily mean)**we should count all the calories in our recipes and strain to **(reduced)**..... fat at every opportunity.

Deliciousness, originality and excitement are what we are **(to look)** for. You can achieve that in recipes that are **(to intend)**to be main courses or comforting supper dishes, and you can achieve it in original salads. The balance **(to come)** in offering readers and viewers all these kinds of dishes.. We can only encourage a balanced approach by ensuring there is deliciousness right across the menu.
